Multiturn Wirewound Potentiometer

Series AL17/19

The AL(R)17/19 range of potentiometers in Ø22 mm housing is designed for applications where a precise and economical multi-turn potentiometer is required.

- Economical and precise multi-turn potentiometer
- Connector version for easy mounting
- ALR17/19 version with integrated slipping clutch
- IP67 version with sealed housing

Potentiometers AL(R)17 with shaft Ø6.35 mm and AL(R)19 with shaft Ø6.00 mm have a screwdriver slot to facilitate zero adjustment. In addition, an optional integrated slipping clutch protects the potentiometer from being destroyed by passing over the end stops. The potentiometer is available with 3, 5 or 10 turns (optional 1, 2, 4, 6, 7, 8 turns). The radial gold-plated connection pins are suitable for flat connectors (2.8 mm to DIN 46247 part 3) and the connector version simplifies installation.

For higher quantities or on-going demand, additional options are available as described below on request

For Example: Multi ganged potentiometers (max. 10), high torque version, sealed housing case, special electrical and mechanical angles of rotation, and special resistance and linearity tolerances. Furthermore we can mount gear wheels or attach cable assemblies with or without connectors and much more.

Note: If you choose the slipping clutch (R) and your application is with the shaft directed downwards, we strongly recommend to order the bearing in the rear lid too - please choose the series AL17/19.

*Note: The sealed version (IP67) is only available with rear connection. There is no possibility for a rear shaft.
