Multiturn Rotary Potentiometer (Wirewound) with Knob

Series MD32

MD32 with soldering lugs

MD32 KA with clamp connection

The manual adjusters MD32 with adjustment knob and locking mechanism are for applications that require a precise multiturn rotary potentiometer.

- Completely pre-assembled set
- 000...999 good readability of the numbers
- Knob in grey or black with locking mechanism
- Soldering lugs or clamp connection
- With many options

These manual adjusters with locking mechanism are delivered ready to install. They consist of a multiturn precision potentiometer series AL17 and the adjustment knob. The potentiometer is available in a 3, 5 or 10 turn version. The radial gold-plated DIN connection pins are suitable for flat connectors (2.8 mm according to DIN 46247 Part 3).
