Function:	Option PG(R)	Option M8(R)	Accessory: M8-Connector
OUT	brown	Pin 3	Pin 3 - blue
VSUP	red	Pin 1	Pin 1 - brown

Pin-Numbering of socket connector in the encoder housing

The orientation of the connector relative to the encoder body is not defined and varies from encoder to encoder. When using right-angle connectors in combination with axial outlets, the orientation of the cable outlet is therefore not defined.

If you need a defined orientation of the cable outlet, please choose our housings with radial cable outlet and use straight mating connectors.

Orientation will vary when using angled connectors.

For details on zero point definition and output programming see page 29.

Definition of the zero position / anti-rotation pin

Output at the zero point:

- HTA25 (analogue outputs): Output signal 0% full scale (F. S.)
- HTP25 (PWM output): duty cycle 10% (10% duty cycle)
- HTS25 (serial output): Output signal 0% full scale (F. S.)
