Optical incremental Encoder

Series OP

- Optical resolution until 10.000 pulses per revolution
- Only 12,6 mm housing depth
- Sleeve bearing or ball bearing
- 6mm or 6.35 shaft diameter
- 2 channels + index
- Supply voltage 5 VDC
- Output electronics TTL
- Temperature range -25° ..100° C

The OP is a shaft encoder, which offers a very high optical resolution. Also remarkable is the low installation depth with only 12.6 mm. The choice of three different operating torques contribute to the positive overall picture.
